

The Movie Project

The Movie Project

Today we'll take a big step forward to attend the most amazing movie revolution ever seen: digital animation. But first let's see who

Can you imagine life without movies? Moving images have always been popular. In China, for example, there were “shadow plays” 5000 years ago. These used firelight to project images of puppets onto screens. So projection is a very old idea. But cinema only became possible when in
